

TREK TO KORIGAD

The Wildlife and Nature Club of NM college organized a trek for the students of junior college. The trek was to Korigad, 20kms south from Lonavla. We had taken 98 students and 3 teachers. We left the college at 7am and reached back at 8:40pm. After reaching the base village in Lonavla, the guides gave the instruction about the trek. It was a 1 hour climb to the top. After reaching the top students were given 1 and a half hour to click pictures and have fun. We also had organised a mini treasure hunt for the students. There also was a presentation about rain water harvesting in the bus. The location was 3000 feet above sea level and the weather was really good. We had great reviews about the trek from the participants. The students had a great experience climbing by themselves independently.
