Event 3: "Survival of the Smartest"

16th December, 2016

Room no: 24

First round of this event consisted of treasure hunt and quiz where the teams of four had to split into two had to go for treasure hunt and the remaining two would solve the quiz back in the class. The team which qualifies in both goes to the second round. The main concept of the second round was comparative cost advantage. Each team was given a commodity - machinery (having the monopoly), fertilizers, labour and agriculture which were assigned different points. Each team specialized in producing a particular commodity traded with others to get other commodities to plan a city, town or a village. The team with the maximum points won.

With this event we came to an end to all the excitement and fun we had throughout the year leaving back a bag full of memories. The teachers and students bid good bye to each other.
